

# AutoTrain e-Learning

## AutoTrain VLE (Virtual Learning Environment)

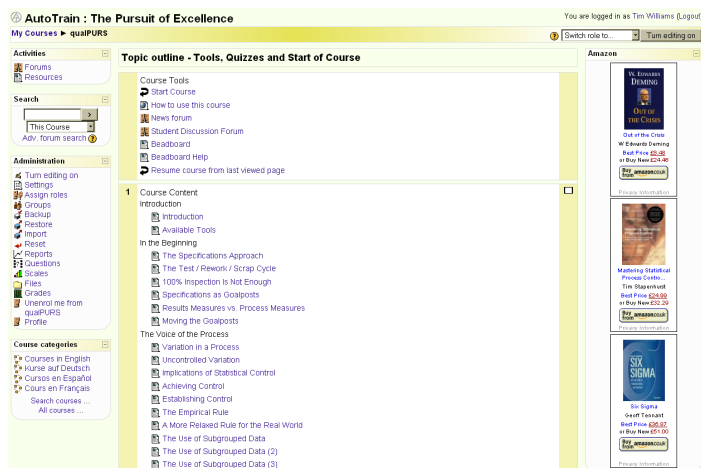

If your company has need of a Virtual Learning Environment (VLE), AutoTrain e-Learning can provide you with a complete service hosted on our servers.

**Design Parameters** : Our VLE system has been designed for robustness, ease of use, accessibility and standards compliance.

**Customization** : AutoTrain has extensive experience of customizing VLE systems to meet a client's specific needs. At your request we can develop, install and maintain additional functions for the VLE platform. We can provide client-specific features for both existing systems you already have and for entirely new systems hosted by us.

**Training** : AutoTrain can provide training for your staff on the use of the platform whether as a student, teacher and system administrator. Training courses can be tailored to your particular needs and carried out either in a virtual environment or at your premises.

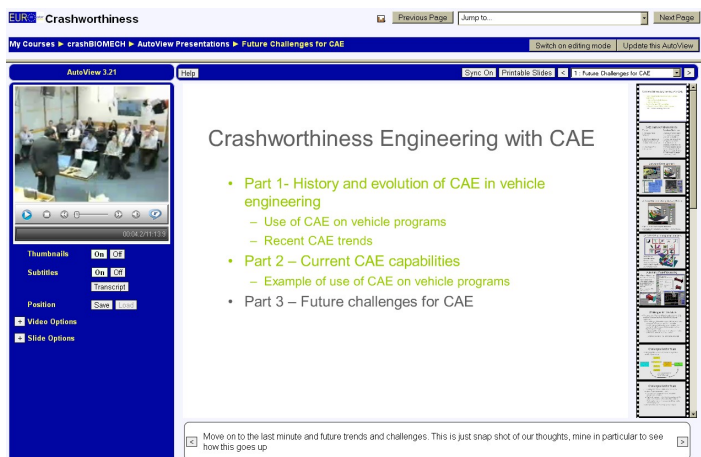

**Course Development** : Our team has over 10 years experience in developing on-line training courses. We can work with you to develop high quality training material for upload into your VLE system.

Multiple Choice Quiz

AutoTrain e-learning is a spin-off from The University of Birmingham. The company is the result of the commercial merger of two successful, long running European funded projects, EuroMotor and AutoTrain.

EuroMotor and AutoTrain have gained international prestige through the past decade developing projects valued at several million pounds.

Our company has been formed to bring to your enterprise the skills and expertise that we have developed in order to offer your business specialist courses and cutting-edge technology for the delivery of learning materials through the internet.
